Greenway's all-inclusive eMobility package, powered by Ensto

Greenway Otomobil provides an all-inclusive electrical mobility package to cater their customers' complex solution needs. Greenway creates its own infrastructure network and manages EV fleets based on Renault's ZOE vehicles.

Ensto's reliable and smart products, responsive management, and experience from the Ukrainian market were key reasons for Greenway's partnership at Antalya, Turkey. Supplied with Ensto Station and Pro charging stations with V2G and V2H capabilities and the Ensto Cloud services, up to twenty charging stations are installed at Antalya, Turkey – enabling Greenway to provide their customers everything a successful EV charging experience requires.

Case facts

- Greenway Otomobil received several charging stations from Ensto to compliment their eMobility package: Chago Station (EVC 100/200) and Chago Pro (EVF 200). Up to 9 pcs were installed, with 10 more ordered for the near future.
- Greenway Otomobil has been extremely satisfied with Chago's products and services. They have plans to deploy an infrastructure network in Istanbul and Ankara with up to 1,000 charging stations in the following two years.
